

PRIVATE HOSPITAL MOLHOLM

- an untraditional private hospital

VEJLE

Easy access to physicians and specialists

Private Hospital Molholm is located on a scenic hill overlooking the city of Vejle – 30 min. from Billund International Airport. The hospital is staffed by some of Denmark's finest and most experienced physicians and specialists, who stand ready to attend to you in a pleasant atmosphere with beautiful surroundings.

With us, you will always be able to get quick access to a wide range of specialist health care services, and all our employees are friendly and attentive to your needs.

We think holistically in terms of your health and help you get the treatment, discretion and care that you have a fundamental right to.

Private Hospital Molholm is based in Vejle, but also has hospital facilities in Aarhus.

The hospital's buildings in Vejle are truly striking; a complex of large patrician villas, steeped in history and exclusivity, which have been converted into a unified and modern hospital.

HOJBJERG/AARHUS

An untraditional private hospital

What makes Private Hospital Molholm unique is that our physicians and specialists are co-owners of the hospital, which means that you can expect a high degree of expertise, commitment and a strong focus on treatment tailored to your specific needs.

We attach great importance to cooperation across clinics and medical fields. This means that our physicians work closely together to determine the right diagnosis and treatment for you, ensuring the best and most successful outcome for your care.

Fundamentally, our position is that we are here to see you, rather than the other way around. That's why you will never feel like a number in the queue at our hospital. You and your health are always in focus, and our main task is to provide the best possible quality of care during your treatment here.

Several ways to receive care

- As a health insurance patient
- As a patient referred from the public health services / waiting-time guarantee patient
- As a private payer

You are always welcome to call and hear more about your options

Your treatment has our full attention

At Private Hospital Molholm, we have reduced all waiting times to a minimum, and our staff make sure that your treatment and the coordination between specialist fields is executed as optimally and efficiently as possible. Our staff - from our service staff, nurses and specialist physicians - have a great personal commitment to the hospital. We often say that there's a truly special work atmosphere here, which we call the "Mølholm spirit". It's about a distinct sense of accountability, motivation and pride that is reflected in all our staff and everything we do. The organisation is informal and direct, which you will notice right away when you receive treatment at our hospital.

You are in close contact with your physician, and you get to talk directly with the specialist in charge of your treatment. This means that you always have full access to detailed information about what you can expect and what your treatment will entail. Our skilled administrative staff schedule all appointments in dialogue with you and keep track of how far along you are in your treatment, ensuring that you don't have to be the coordinator of your own treatment and can instead focus entirely on being a patient. We strive to take care of everything for you in general, and it's important to us that you feel well-informed throughout your treatment.

” We believe that the surroundings and personalised treatment plays a big role in creating the best possible experience for you during your stay with us...”

Documented success and quality

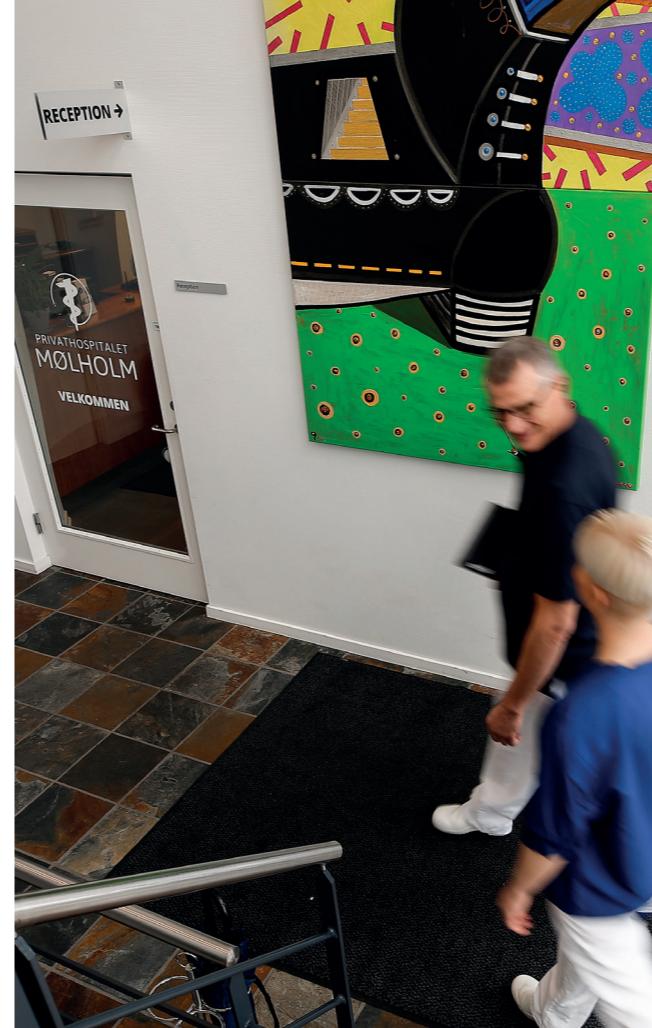

At Private Hospital Molholm, you always have access to specialists with a high level of expertise and qualifications who are highly respected in their various fields of medicine. Our success rate and quality of treatment is very high, and we continually monitor the performance and results of all our clinics. Our high quality of care has been documented by the Danish Institute for Quality and Accreditation in Healthcare (IKAS). We are proud of the fact that we are the only private hospital in Denmark which has received the IKAS Award of Accreditation and certification without comments since 2010, when the accreditation programme was introduced.

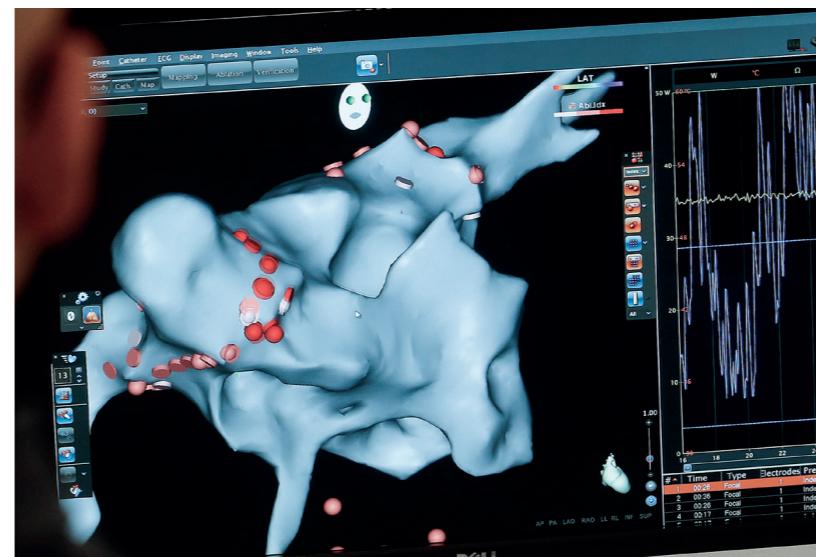

The conclusion from the 2017 accreditation read as follows:

“There is a high level of expertise and high efficiency. Everyone feels a sense of responsibility for completing the task at hand. We saw teamwork and genuine application of the mantra “patient-focused care” here. Keywords such as quality, peace of mind and trust exist within the organisation and are also expressed in the sentiments of the interviewed patients.

All 192 indicators have been met.” 

It's a conclusion that we are very proud of, of course, and we will continue to work hard at maintaining the high level of quality at Private Hospital Molholm.

Advanced technology

Everything we do is characterised by high quality. This is also reflected in our buildings and equipment. At our disposal are the most modern operation facilities and advanced technology, such as MRI and CT scanners, which are necessary in order to provide you with the most correct and accurate diagnosis.

Many of our patients note that our hospital seems a lot more homely than a typical hospital. It makes us thrilled and proud to hear that, as that is precisely our goal: for you to feel welcome and at home, while at the same time we making no compromises on hygiene.

We believe that the surroundings and personalised treatment plays a big role in creating the best possible experience for you during your stay with us. During your hospitalisation, our staff will take great care of you and do their very best to meet your needs.
